

Environment Policy Statement of Intent

Our club recognises the environment and the service we can provide in the protection to it.

It has always been the policy of the club to provide commitment to the environment by planning and implementation and quickly reacting efficiently.

The club will endeavour to meet the requirements of each, and every environmental obligation obtained. In doing so our club seeks to please and enhance member satisfaction that we are doing are bit.

The club will demonstrate commitment to the quality of our service recognise the need to care for the environment and prevent pollution.

Our club operates a safety control management system (SCMS) with advice and assistance from SafeAid UK (England) Limited Health & Safety Services. Our partnership helps us to complete objectives of achieving and maintaining a strong Health & Safety structure.

Our commitment and belief to continual improvement is always demonstrated on our work areas by establishing and monitoring club improvement and objectives, which shall be communicated throughout the committee and club.

It is of policy to ensure that all our activities are carried out with ongoing performance relevant environmental legislation.

We continually seek to minimise waste arising from club activities and operations. We promote recycling wherever possible, to help reduce energy usage. We plan, control and reduce potential harmful impact to the environment from the club activities and operations.

Our club aims to work with our members and affiliates to assist in the understanding of potential environmental effects of their operations and activities.

We promote the control and reduction of such environmental impacts and have sound policies in place to protect the environment.

Further features of our control management system are being committed to improving environmental performance. We achieve this is by the setting of objectives and goals which are regularly monitored and reviewed. Our objectives and goals shall be publicised throughout the club to all members.

This policy, the responsibilities and obligations are required by the control management system in place and have been communicated to all members.

Commitment to this policy is essential to maintain the standards set within it and can only be effective and achievable with everybody's commitment.

For the member responsible for Health & Safety
